### 1. Technologies used

Buried Beneath uses cookies and similar browser/device storage technologies where necessary to operate authentication, security, preferences, payments, notifications, PWA/offline functionality and, where enabled, analytics.

### 2. Essential technologies

- Authentication/session and security storage.
- Stripe payment/security technologies.
- PWA service-worker caches needed to load the app shell.
- Local storage used for saved offline registers, QR data and queued attendance actions.
- Preference and functional storage needed to provide requested features.

### 3. Non-essential technologies

Analytics, advertising or other non-essential technologies will only be used in accordance with applicable consent requirements. Where consent is required, users will be offered a genuine choice and can change preferences later.

### 4. Managing storage

Users may clear cookies/site data through browser/device controls. Doing so may sign the user out, remove locally saved offline registers/QR information and prevent offline functionality until data is cached again.

This document forms part of the Buried Beneath Platform legal suite and should be read with the other policies applicable to the relevant feature or transaction.
